Dear Mr. Cervantes,

Greetings!

We are a group of 4th-year BS Information Systems (BSIS) students from the College of ICT, and we are organizing an upcoming webinar titled “**Building Scalable Data Models: Insight into Information Systems Architecture and Design**,” scheduled for **Friday, September 20, 2024**, to be held via **Google Meet**.

It would be an immense honor for us if you could kindly accept our invitation to be the guest speaker for this event. As students passionate about data, systems, and technology, we greatly admire your accomplishments in information systems, particularly your leadership as the Director of the Management Information Systems Office at West Visayas State University. We are confident that your expertise would provide invaluable insights and inspire both aspiring professionals and experienced data enthusiasts in attendance.

The webinar is structured to provide a comprehensive overview of how to design scalable data models that can adapt to increasing demands regarding data volume, users, and system complexity. It will cover a balance of theoretical concepts and practical strategies, such as:

- The fundamentals of data models and their importance in modern systems
- How scalable data models integrate into information systems architecture
- Tools and technologies that support scalability
- Real-world case studies on the application of scalable data models across various industries
- Techniques to optimize performance, ensure data integrity, and handle growing complexity
- Future trends in data model scalability and addressing challenges with practical solutions

Given your extensive experience and knowledge in the field, we believe your presentation will greatly enhance the learning experience for our audience, especially as we approach our professional careers in information systems. While the event is scheduled for Friday, September 20, 2024, we are more than happy to assist in preparing the layout and presentation materials

according to your preferences, ensuring that everything aligns with your speaking style and content.

We understand that you have a busy schedule, but we sincerely hope you will consider sharing your time and expertise with us. If there are any additional arrangements or specifications required, we would be more than willing to coordinate to ensure everything runs smoothly.

Thank you very much for considering our invitation. We look forward to your positive response and the opportunity to learn from you at our webinar.

Sincerely,

LEILYN MAE D. ABELLAR

Student, BS in Information Systems

GED ELIZARIO
