Recruitment Team

1 Apple Park Way,
Cupertino, CA 95014,
United States

Dear **Recruitment Team**,

I am excited to apply for the Data Insights and Reporting Analyst (Student Position) at Apple Inc., an opportunity that perfectly aligns with my academic background and career aspirations in data analysis and business intelligence. Currently pursuing a Bachelor of Science in Information Systems with a focus on Business Analytics at West Visayas State University, I have built a solid foundation in data analysis and problem-solving through coursework in Data Structures and Algorithms, Fundamentals of Business Analytics, and Data Mining, which I believe will be valuable in this role.

In my capacity as an Executive and Board Member of the Research & Development Committee in our university's robotics organization, I had the privilege of enhancing my leadership skills while organizing workshops and analyzing data to optimize algorithms for robotics projects. This experience fostered a passion for collaboration and innovation that I hope to bring to your team. Additionally, my internship at the Department of Science and Technology Region VI provided hands-on experience conducting microbiological and chemical analyses, emphasizing quality control and the importance of accurate data interpretation—skills that are crucial in the financial sector.

Currently, I serve as a Volunteer Student Assistant in the Management Information Systems Office at my university, where I developed a WordPress-based website for accurate data visualization and manage data validation for university documents using Excel. This role highlights my attention to detail and commitment to ensuring data integrity, both of which I understand are vital in your organization. You can also find some of my outputs and projects showcased on my GitHub profile, which demonstrates my technical skills and dedication to learning.

With proficiency in Microsoft Excel, R Programming, Orange, Power BI, and various web development technologies, coupled with strong interpersonal skills, I am eager to contribute positively to Apple Inc. while furthering my knowledge of data insights and reporting. I appreciate your consideration of my application and look forward to the opportunity to discuss how my background and enthusiasm can benefit your team.

Thank you for considering my application.

Sincerely,

Leilyn Mae D. Abellar

Fourth-Year Student, Bachelor of Science in Information Systems
West Visayas State University
